

Response Code Details

The following tables describe the response codes and response reason texts that are returned for each transaction. In addition to the information in this document, the Authorize.Net Developer Center at <http://developer.authorize.net/tools/responsereasoncode> provides a valuable tool for troubleshooting errors.

- **Response Code** indicates the overall status of the transaction with possible values of approved, declined, error, or held for review.
- **Response Reason Code** is a numeric representation of a more specific reason for the transaction status.
- **Response Reason Text** details the specific reason for the transaction status. This information can be returned to the merchant and/or customer to provide more information about the status of the transaction.
